

INHIBITING DEFICIENCIES

1 QUALITY GUIDANCE FROM OTHERS

How Do We Improve Our Influence and Education?

These cards outline various ways to improve guidance from others. When parents, teachers, spiritual leaders, and other mentors do not themselves have high enough levels of understanding, skill, priority and authority to teach children what they need to know to improve their EQ, it is much more difficult for children to learn and apply such knowledge on their own. Quality guidance in this century requires educators to better balance the number of conventional lessons with a broad scope of knowledge that students need to learn about healthy mind development and improving human behavior.

Inspire Appreciation	Healthy Approach																																																																			
Define benefits/value	Model self-effort																																																																			
Show interest in potential	Reward efforts/success																																																																			
Show belief in student	Instill helpful disciplines																																																																			
Encourage EQ work	Define guidelines well																																																																			
Help overcome problems	Create one-on-one time																																																																			
Nurture accountability	Encourage involvement																																																																			
Nurture fulfillment	Reward patience																																																																			
Nurture healthy attitude	Stimulate conscience																																																																			
Understand needs	Reward cooperation																																																																			
Make tasks inviting	Explain consequences																																																																			
Basis of Current EQ	EQ Improvements																																																																			
Past studies/practices	New studies/practices																																																																			
Past experiences	New experiences																																																																			
Past Influences/incentives	New influences/incentives																																																																			
Past accomplishments	New challenges																																																																			
Past ideas/resources	New ideas/resources																																																																			
Past research	New research																																																																			
Past improvements	New improvement																																																																			
Current insightfulness	New insights																																																																			
Current beliefs/ideals	Open to new beliefs/ideals																																																																			
Current credibility	Open to advance standards																																																																			
Easy-to-Follow	Healthy Approach																																																																			
Clear thorough directions	Helpful metaphors																																																																			
Interesting presentation	Enlightening facts																																																																			
Simplified examples	Intriguing statistics																																																																			
Helpful ways to practice	Valuable assessments																																																																			
Valuable points stressed	Written creatively																																																																			
Practical well-paced	Well-designed graphically																																																																			
High value activities	Quality tools																																																																			
Well-defined fair testing	Quality content																																																																			
Memory exercises	High standards																																																																			
Empathetic to learner	Meaningful priorities
